Innovation in Sustainable
Image - Narrative

Construction is the core of any building, and it is one of the most important factors in determining the overall sustainability of a structure. There are many factors associated with ensuring greater efficiencies and delivering improved levels of carbon reduction, including:

- [The Impact of Construction on Environment](#)
- [Understanding Sustainable Materials](#)
- [Commonly Used Sustainable Materials \(Bamboo, Cork, Recycled Plastic, Cross-Laminated Timber & Stone\)](#)
- [Innovative and Emerging Sustainable Materials \(Mycelium, Pollution-Absorbing Bricks and 3D-Printed Concrete\)](#)
- [Benefits of Using Sustainable Materials In Construction \(Environmental Benefits Economic Benefits & Health Benefits\)](#)

Modern construction has become a paramount concern, driving the industry towards the adoption of building materials that promise lower carbon footprints and waste reduction. This shift is in line with the rising need for long-lasting, cost-effective, and environmentally friendly constructions that benefit people as well as the environment. It also complies with environmental regulations. As sustainable development becomes a beacon for future projects, exploring the top sustainable building materials becomes essential for professionals looking to make informed decisions in their construction practices.

The world of sustainable building materials is explored in this article, which highlights cutting-edge materials like mycelium or 3D-printed concrete that are making significant advancements as well as more widely utilised options like bamboo, cork, and recycled plastic.

The Impact of Construction on Environment is enormous, both in terms of global carbon emissions and natural resource consumption. According to the [World Economic Forum](#), 39% of the world's energy-related carbon emissions are attributed to buildings; 28% are from their operations, and 11% are from materials and construction.

By using resources that demand less energy for production and maintenance, sustainable building materials help offset the harmful consequences and lower the total environmental footprint of the buildings. Materials that require little processing,

such as bamboo and cork, are gathered from [renewable sources](#), saving energy and decreasing waste.

ABOUT WHICHRENEWABLES.COM

Whichrenewables.com is an exciting new digital HUB for industry professionals in UK & Ireland. Pulling together all the strands of emerging Renewable Sustainable and Environmental sectors, our specialist team of industry experts provide relevant industry news, information and advice.

Our aim is to become a valuable one stop source for two types of clients.

(1) Sustainability and Procurement officials wishing to source the market for ideas, case studies, comparing and contrasting products, new innovations and services, and a reliable outlet for keeping abreast of what's "new and happening" in their sector. We aim to keep you well informed and sometimes entertained!

(2) If you're a company with a reputable product or solution – Which renewables is the ideal platform to build your brand, showcase your product offering or service.

Our Expert Panel

Whichrenewables.com have proudly assembled a team of industry experts to make sure we are always on the ball with what is happening in each specific sector. Sought out as lead speakers and MC's at many of the premier trade shows and exhibitions across the country, our extended team at Which Renewables pride themselves on being well informed and up to date, especially across specialist areas, product knowledge, industry regulation, technical guidance...and much more!

Ciaron King

Ciaron King is CEO of Digren Energy Management, a leading London and Dublin based consultant company with an unsurpassed and intricate knowledge of Energy monitoring, markets and management. Under Ciarons direction, his team offer analysis and advice across a range of relevant subjects, using technologies and systems to collect, anticipate real time data on energy consumption in business facilities. Specialist areas include energy procurement, energy storage, voltage optimisation, along with energy analysis, auditing and market intelligence. Working across multiple sectors including construction, retail, hospitality, healthcare and agriculture, Ciaron and his team at Digren Energy management have you covered, whether it is to reduce carbon emissions, embark on Solar PV or EV Charging Projects, or lead your organisation on its journey to net zero.

Contact Ciaron at

Dr Euan McTurk

Dr Euan is a consultant Battery Electrochemist with a peerless knowledge of lithium-ion cell behaviour and has devoted years to advancing the functionality of next generation cell system optimisation and management. Dr Euan is the creator and presenter of Plug Life Television, a YouTube channel devoted to battery tech and electric vehicles, explaining complex processes within batteries that lay people can understand – as well as advocating for technologies and processes that will facilitate widespread adoption of EV across the globe. Issues such as functionality, safety, durability and maintenance are just some of the subjects that Dr Euan has mastered. Dr Euan is also co-founder of Charge Saint – a cost-effective solution to tackle blocked or broken infrastructure in conjunction with Charge Point Operators, local authorities, and e mobility stakeholders. Based in Edinburgh, Dr Euan brings a wealth of knowledge across Battery Behaviour and EV sectors and is a go to operator of the highest calibre.

Contact Dr Euan directly on

Neil Elliott

Neil Elliott is an award-winning pioneer in renewable energy systems, having established his business Future Renewables in 2009. A keen mountaineer, Neil won NI chamber of commerce entrepreneur of the year for 2023. With a wealth of experience gained from thousands of domestic, commercial, and Agri business installations and advisory consultations, and a comprehensive knowledge base covering the full spectrum including Solar PV, Heat Pumps, Wind Turbines and hydro systems. Whether your project is a self-build with bespoke engineering to maximise energy savings, or a large business (or agri Business) targeting net zero and alleviating energy costs, Neil will offer expert consultation across the entire platform including design, electrical and mechanical engineering, and environmental consulting.

Contact Neil directly at.....

Chris Russell

Peterborough based Chris Russell has a broad expertise across renewable technologies and has a passion for driving the green energy sector forward across UK and Ireland. Chris has extensive experience and deep understanding of securing Green Energy Asset & Project finance. His company Sustainable Energy Finance (SEF) provide specialised funding solutions to clients on behalf of a vast network of lenders and funding partners dedicated to Renewable Energy. Chris specialises in the securement of asset finance and PPA (Power Purchase Agreements) from 30kWh up to 35 years, and offers a comprehensive suite of options to SMEs, Energy Service companies (ESCOs) manufacturers, suppliers, installers, project developers, in fact all parties involved in the renewable energy sector. Chris is proud to become a panelist and advocate for Whichrenewables.com.

Contact Chris directly at.....

James Poynter

Whichrenewables.com welcome James Poynter to our panel. James is currently business development director at Carbon Neutral Britain – the UK's Leading Carbon Offsetting Initiative – helping British individuals and Businesses make an impact on Climate Change. They are one of the largest NGO (non-governmental Organisation) in the UK dedicated to tackling the Climate Change Crisis by educating and providing voluntary carbon offsetting to all – from individual subscriptions, charities and organisations – to businesses of all sizes. Based in Central London, projects to date have already offset over 3m tonnes of CO₂e and planted over 2 Million Trees, helping stop climate change and providing essential forest habitats for endangered wildlife. Via projects and offsetting initiatives, James and the team at Carbon Neutral Britain believe Carbon Offsetting is the answer to the climate crisis – as the cheapest and most effective way to make a difference – fast.

Contact James directly at.....

Kirsty Bell

Kirsty Bell is an experienced environmental compliance consultant at Arthian. Based in Edinburgh, just one of 17 office locations across the UK & Ireland, Arthian is recently established following a merger between Mabbett and IKM. Arthian are a trusted partner, working collaboratively to deliver client focused solutions to deliver the full lifecycle of a project across technical excellence, innovation and industry experience. From feasibility, all the way to design and construction. ESG is a major part of Arthian company ethos, both in practice and in consultancy across a whole range of practices including environmental monitoring, air quality assessment, circular economy, waste and wastewater, legal compliance, energy and carbon as well as ESG strategy setting.

Contact Kirsty directly at

Nick Proctor

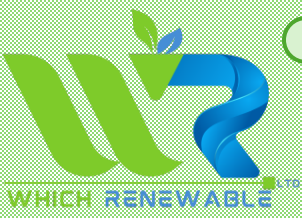

Nick Proctor started Amber in 2009, and without any external investment has grown his company to 160 employees, and a €10m annual turnover. Amber transforms the way businesses engage with energy. Our Energy Management and Net Zero service are supporting businesses to save time, money, and carbon, across the following sectors – Energy Management, Compliance, Net Zero, Power Purchase Agreements and SME Energy Procurement. Dedicated to helping UK businesses reduce costs, consumption and carbon as well as consultation around energy legislations to avoid financial penalties and reputational risk. Working with some of the biggest brands on the planet, Amber's energy compliance service ensures clients meet deadlines and avoid penalties. Delivering a client centered service that includes energy management and consultancy, risk management, bill validation, energy procurement, waste management and target setting, Amber is the trusted partner of choice to many of the UKs top brand businesses.

Contact Nick directly at

Nikki Flanders

Nikki has recently been appointed to SSE plc group executive committee representing SSE customers by providing energy solutions to businesses in UK & Ireland as SSE continue to invest in and build a net zero energy system. Nikki has over 20 years experience working in retail and energy sectors and leads a team of over four thousand professionals who provide innovative sustainable energy solutions for both domestic and commercial sectors. Nikki is recognised as a game changer and a versatile leader who has contributed to the success of several FTSE 100 companies.

Having a trade exhibition or event in your area? Just let us know and we will be glad to publicise it on Whichrenewables.com for free.

Got a story or anything relevant to share? Sure, let us check it out and if appropriate we will share with our readers and take your story to our wide ranging audience.

Just drop us a line with some details to - info@whichrenewables.com

Following on from the success of the YouTube channel Plug Life Television, and its thousands of followers, Which Renewables panelist Dr Euan McTurk has gone a step further and formed his own consultancy programme - Plug Life Consulting Ltd. His independent consultancy provides technical, strategic consortium building, project management and public outreach expertise to academia, industry, business, media and government organisations, covering a wide range of projects including battery electrochemistry, electric vehicles, energy storage systems and charging infrastructure. Whilst these are Dr Euan specialist “subjects” he is always open to hosting topics that are outside this forte, hosting your company sales directors and allowing your new product innovation or brand to grab the attention of the followers of not only this website, but it can also be provided to you afterwards for the purposes of your own company media channels.

The Which Renewables team carry expertise across many sectors of the renewable sustainable and environmental sectors, and where relevant, they will jump on as well to ensure continuity and lively discussion.

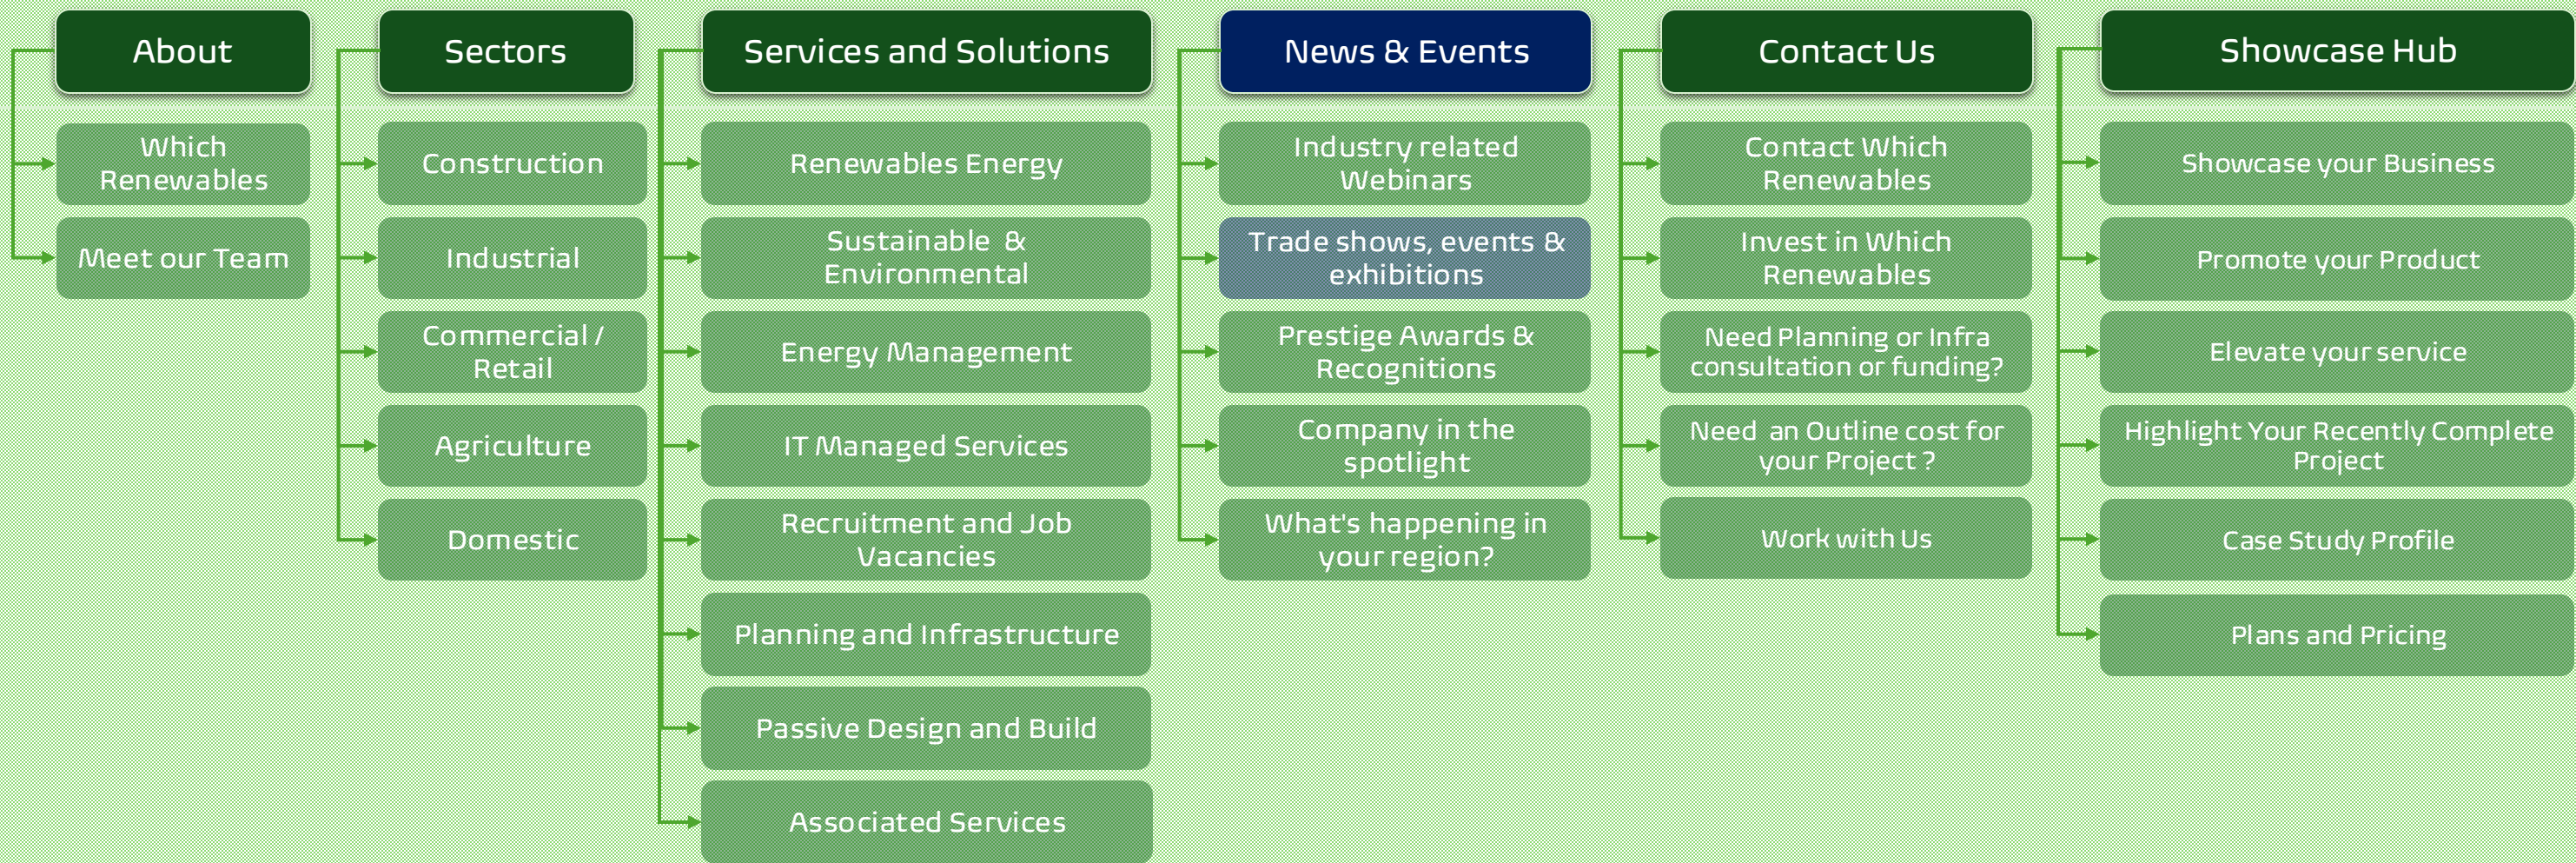

Depending on your budget, Dr Euan and his technical film crew are available to visit your premises and highlight many of your products or images of case studies etc.

Please contact Dr Euan independently at discussion@pluglifetelevision.co.uk or contact frank.delargy@whichrenewables.com who will gladly arrange an introduction.

HAVE A LIVE WEBINAR PLANNED?

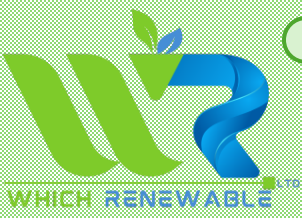

Just let us know the details and Which Renewables will be happy to share the details to our wide audience, for free. Its all about saving the planet!

Contact info@whichrenewables.com

Event Dates	Event Name	Location	About the Event
Thu, 11 Sep 2025	Northern Ireland Renewable Energy Event	Lisburn	Event focused on renewable energy initiatives in Northern Ireland, showcasing advancements, fostering discussions, and promoting sustainable practices within the energy sector.
Wed, 17 - Thu, 18 Sep 2025	Energy, Fuels and Decarbonisation Expo (EFD Expo)	Birmingham	The Energy, Fuels & Decarbonisation Expo, the UK’s leading event focused on sustainable energy solutions, is set to take place at the NEC in Birmingham. This two-day expo serves as a hub for professionals across the energy spectrum, including local authorities, energy suppliers, brokers, and consultants, facilitating valuable networking opportunities and strategic meetings. The expo is designed for anyone involved in energy management, alternative fuels, and clean energy innovations, creating an environment ripe for discovering cutting-edge technologies and lucrative investment opportunities.
Tue, 23 - Thu, 25 Sep 2025	Solar & Storage Live	Birmingham	Solar & Storage Live UK is the UK's largest solar energy exhibition, showcasing innovative solar and storage solutions for various projects. It brings together industry professionals to explore technology and solutions for the energy transition, featuring exhibitors, case studies, and networking events. The event also includes dedicated zones for training, recruitment, and competitions, celebrating excellence in the solar industry.
Wed, 01 - Thu, 02 Oct 2025	Renewable Energy Scotland Event	Glasgow	This conference focuses on renewable energy trends and innovations, featuring insights from industry experts, researchers, and policymakers. It aims to foster collaboration and knowledge-sharing among professionals in the sector to promote sustainable energy practices and opportunities.
Tue, 07 - Wed, 08 Oct 2025	Future Energy Wales	Newport	Future Energy Wales is set to take place at the International Convention Centre Wales in Newport, United Kingdom, from October 7 to October 8, 2025. This premier event will gather industry leaders, innovative thinkers, and policy makers to explore the latest advancements in energy technology and sustainable practices. Attendees can expect a dynamic program filled with insightful keynote speeches, interactive panel discussions, and networking opportunities designed to foster collaboration and drive forward the energy

Each month we invite businesses to send us a three-minute business pitch. We only plan to host five of these each month, so your message will be heard by most of our customers and potential clients.

Each pitch will be embedded in our “Pitch Your Business” Category for 6 months, until it lapses, so at any time the most we will feature across the UK & Ireland will be 30 businesses.

Contact us to find out about how we advise you to structure your pitch, and the format which you will use to provide it.

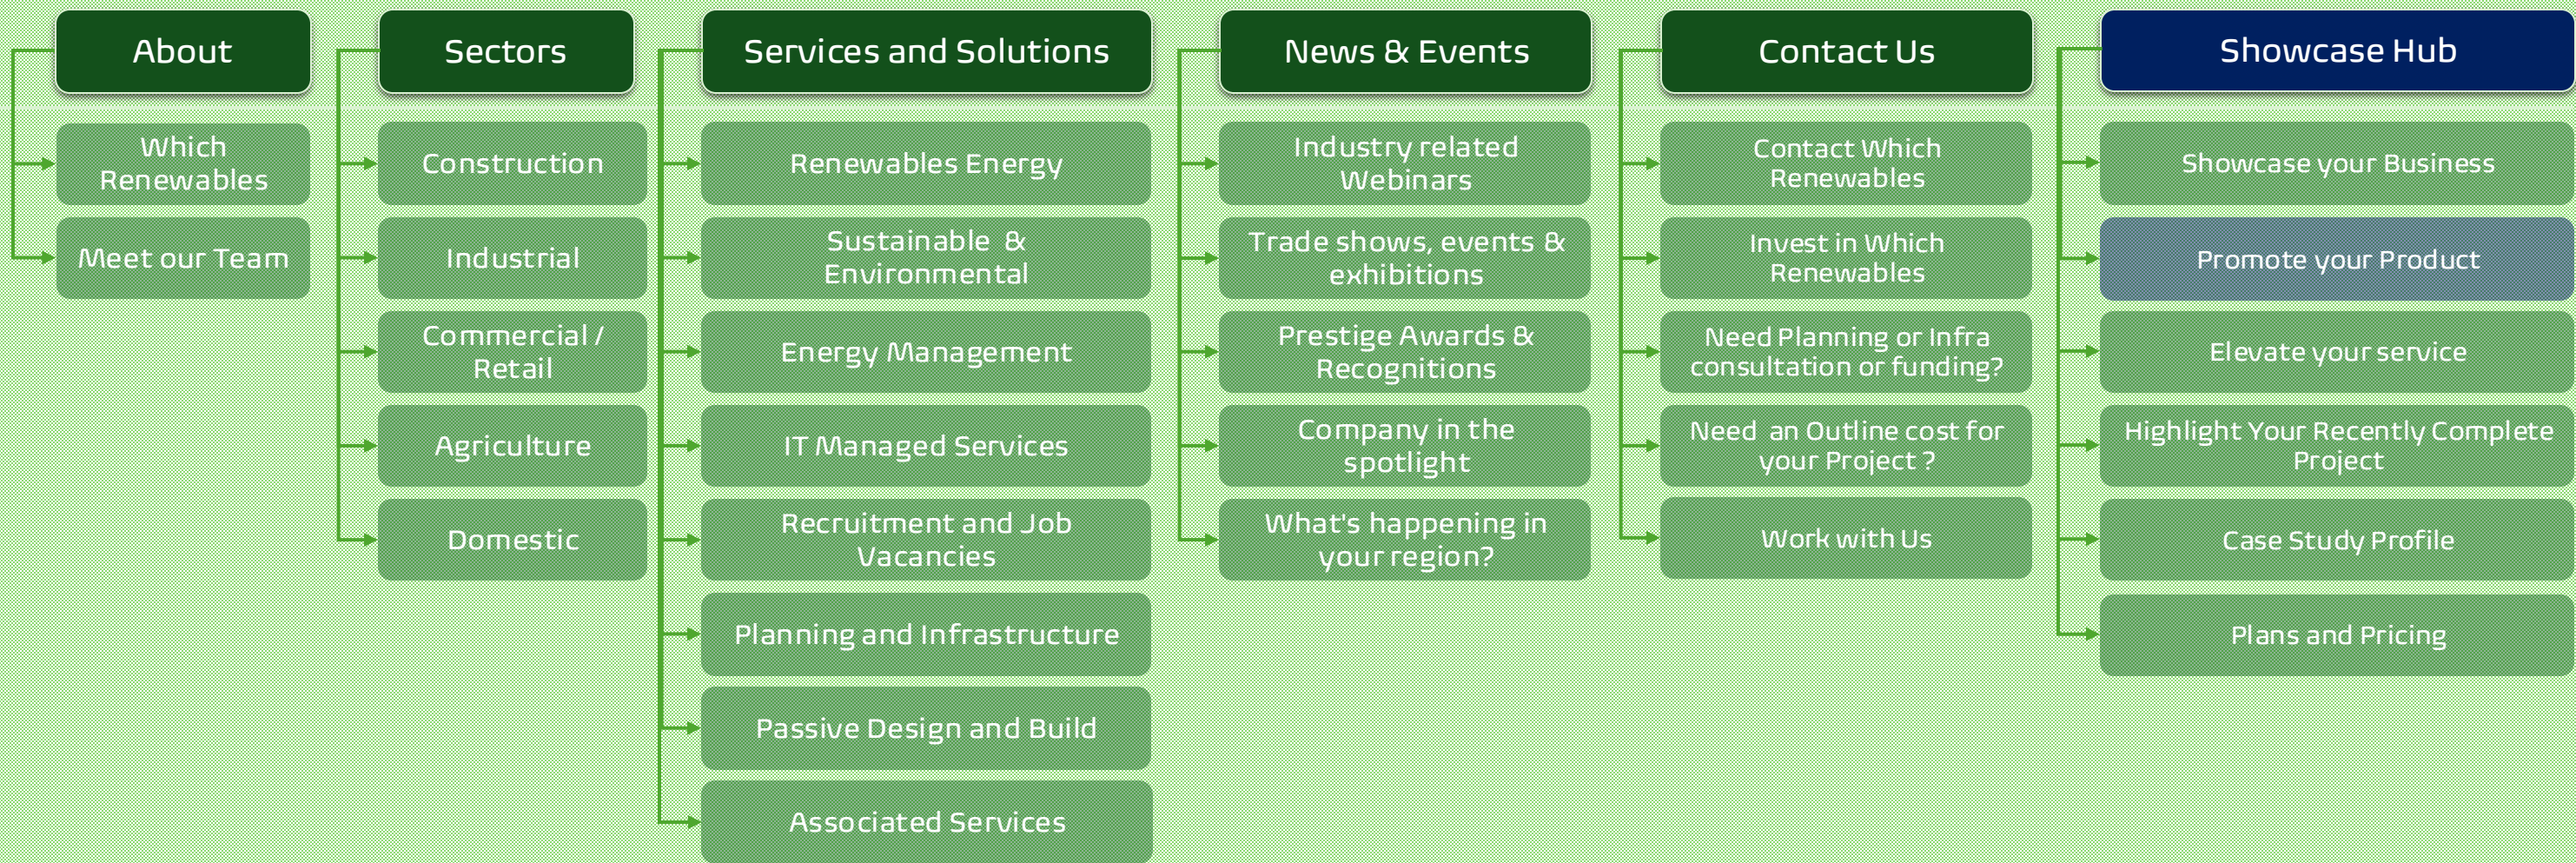

Contact info@whichrenewables.com for more information
